**ENGINEERED
FOR BUSINESS**

EPSON®
EXCEED YOUR VISION

INTEGRATED, INTERACTIVE MEETING ROOM SYSTEM

No.1 SINCE 2001
EPSON
WORLD LEADER
IN PROJECTORS*1

Transform your business with the all-in-one interactive meeting room system from the world number one in projectors*1. The Epson EB-1400Wi Series enhances collaboration and productivity by combining ultra-short-throw projection, interactive whiteboard, paper flipchart and more in a single device.

The complete integrated solution

Capture content from external sources, share and consolidate using interactive projection and Epson's easy interactive tools, then save, print or e-mail to distribute content effectively.
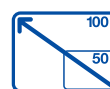

Change the way you present

These ultra-short-throw projectors eliminate glare and shadows and create perfect images. They make one-sided presenting a thing of the past and maximise audience involvement with real-time annotation and multi-location involvement.

Easy to set up and use

Forget complex multiple devices and training. These projectors are simple to use from start-to-finish. Easy to install in any room, they connect to a wide range of sources, including PCs, mobile devices, wireless office networks and USB flash drives.

---

100 / 50 Project big screen images up to 100in from close range

Easy wireless connection saves set-up time

Annotate directly onto the projected image with dual pens

iProjection app enables wireless projection from both iOS (4.2 or later) and Android™*7 mobile devices

Save presentations/minutes and more directly to USB memory
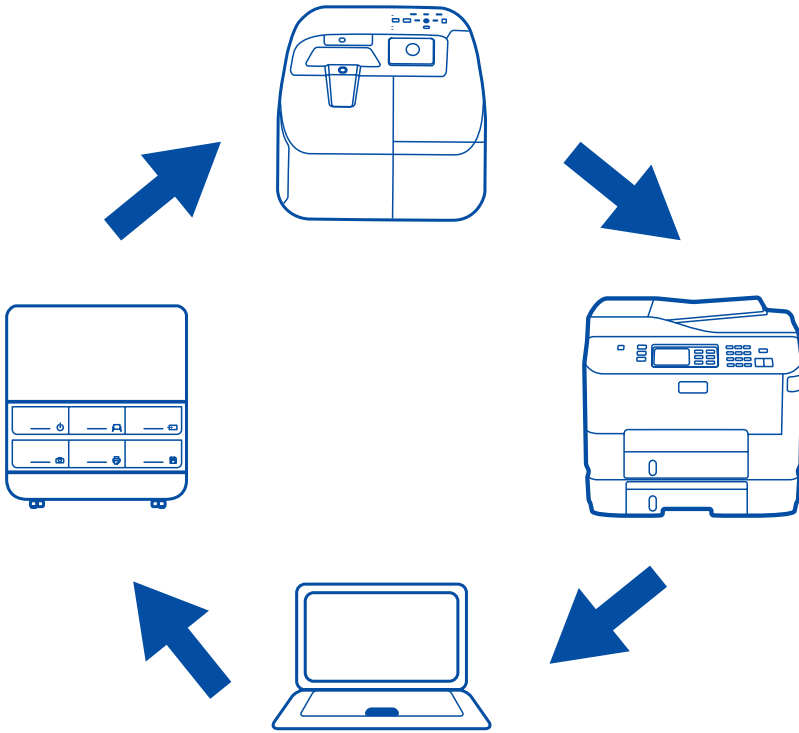

Send presentations/minutes and more directly via email

Print the meeting memo instantly from the projector

Digital workflow

The Epson EB-1400 series digital interactive system makes the audience an integral part of the presentation, inspires discussion and enables ideas to be added, saved and shared. The result is a very smooth digital workflow.

– Project big, clear, colourful images with no shadows or glare
– Annotate and enhance presentations with dual interactive pens
– Create an electronic flip chart, then add, copy and delete pages as content is collectively reviewed
– Print documents immediately, either locally or to a network resource
– Save created content locally to USB, to a network location, or share via e-mail
– Take control of all aspects of presenting and manage documents with the control pad

Turn any flat surface interactive

Create a bright, 100in interactive projection surface on a wall or desktop and create the perfect collaborative environment.

– Interactive pen also provides mouse control
– Choose from a range of interactive tools
– Compatible with virtually any PC-based software application
– Four mounting positions (wall, ceiling, desktop and table projection)

SMOOTH DIGITAL WORKFLOW

With the Epson EB-1400Wi Series, information flows clearly and smoothly from screen to viewers, who can then discuss and develop the subject using the interactive features. Results can then be saved via USB, emailed or printed.

The Epson EB-1400Wi Series provides an integrated, interactive digital meeting room system that enables face-to-face, real time communication without the need to travel between locations. Choose how, when and where you share information and ensure the most efficient use of time and resources.

Video conferencing

Share information and involve audiences by projecting information from a PC while holding a video conference on the same screen.

– Interact with other locations whilst viewing common information
– Enhance involvement and understanding by connecting visually with colleagues

Split screen

Project images from two input sources simultaneously and ensure clarity with a screen size up to 100in.

– Enhance staff meetings with interactivity based around applications including Microsoft Office Excel, Word and Powerpoint*2
– Compare and discuss information from different sources at the same time

Multi-location

Share a single PC screen with up to four network connected projectors. Annotations from any one of the four projectors will be displayed on the other three thanks to the EasyMP Network projection software which shares both content and interactivity.

– Collaborate and annotate from remote locations
– Image annotation can be completed from up to four remote locations, using one pen per location

Wireless content delivery

Deliver content wirelessly from a PC or Mobile Device for easy information sharing

– EasyMP Network projection enables users to wirelessly display PC content direct to the projector while maintaining mouse control
– Connect and display content from iOS/Android mobile devices. The iProjection App enables users to deliver mobile device content direct to the projector

Ultra-short-throw projection
Easy installation, no shadow or glare

A collaborative experience
Capture, create, consolidate and share data to support effective collaboration

Easy set-up and operation
Flexible features and intuitive software enable easy operation and effective information sharing

Low maintenance
Low Total Cost of Ownership (TCO) Long lamp life up to 4000 hours*[3] Filter maintenance intervals up to 5000 hours*[4]

Intelligent presenting system
Supporting a fully digital workflow the EB-1400Wi Series combines the benefits of ultra-short-throw projectors, interactive whiteboards, and paper flipcharts in a single integrated system

**No waiting, no warm-up**
Quick Start and Instant Off

Wired/wireless connectivity
Flexible connection makes sharing information simple

Smart information sharing
Display content from a range of sources then save as PDF to USB memory key or network location, print or send via e-mail.

TABLET   PC   USB   SCAN

SAVE   PRINT   E-MAIL

Easy operation control pad
Power On/Source Search/Capture Content from an external source/Print or Save Content (locally or to a network location) at the push of a button.

Based on Epson's in-house test results. *5Content can be saved as PDF or single page png file. Files may be saved locally to a USB key or to a pre-defined network folder. *6Windows® and Linux® only, driver required for Mac®. *7Android is a trademark of Google Inc.

Integrated business solutions

Dual interactive pens

Add freedom and involvement to business presenting with digital interactive pens that 'write' on the screen.

– Fast response, picks up movement even when hovering
– Annotate projected images with or without a connected PC and save content either locally or to the network*5
– Light, compact and easy to use
– Dual pens for simultaneous annotation
– No drivers required*6

Control pad

Take central, one-touch control of the EB-1400Wi Series system with this versatile multi-function control pad.

– Position on a table or wall
– System or battery powered
– Connect printer/scanner and read data from USB memory key
– Search available input sources
– Select whiteboard mode
– Capture, print or save content

Compatible printers

Add high quality printing with the WorkForce Pro 4000 Series.

– Print, scan, and copy in a single device
– Great value with individual inks
– Compact footprint
– Easy integration into office printer networks
